

Native Americans Can Get Additional No-Cost Health Insurance

With a BeWell plan, you can keep seeing your Indian Health Service or Tribal /Urban Indian Health Centers providers, and access specialty, urgent, and emergent care through a qualified health plan.

How BeWell Works With IHS Coverage

Your BeWell plan does not replace IHS or Tribal/Urban Indian Health Centers coverage, but additional insurance can help your local clinic! When insurance pays IHS or Tribal Health for your medical visits through a BeWell plan, IHS and Tribal Centers use that money to take care of your community.

Questions? Call 1-833-862-3935.
BeWellnm.com

Having a BeWell plan compliments your IHS and Tribal Healthcare coverage; especially if you don't qualify for Purchased/Referred Care (PRC). Our plans pay for emergency care when you travel, and you can see providers outside the IHS and Tribal Centers service area.

Services include:

Emergency care, hospital stays, lab services, maternity and newborn care, mental health and substance use disorder, outpatient care, rehab services and equipment, prescriptions and more.

How to Get Additional No-Cost Insurance

You may be eligible for no cost-sharing and tax credits through BeWell to help pay for health insurance based on your tax household and annual gross income.

- No copay, deductible or coinsurance at IHS or Tribal Centers.
- You don't need a PRC referral to see a provider outside of IHS.

You can sign up for BeWell plans year-round.

We can help you understand how our plans work with IHS or Tribal Centers coverage, and the best plan for you. Our Native American Certified Assistors can guide you through the process and answer your questions.
